

Thank you for buying an Angelo Décor Fountain!

We hope you will find these instructions helpful in setting up your fountain.

If you have any issues with this item, please **DO NOT** return the unit to place of purchase. Please visit our web site, www.angelodecor.com, for assistance and warranty information.

First unpack carton carefully, arranging parts safely in your working area.

Arrange all pieces in your workspace.

Pass the power cord down the cord pipe (located inside the bowl).

Align the power cord with the groove at the base of the pedestal.

The pump is set to full strength. Adjust as needed if splash is a concern.

Place the pump and attached light inside the water reservoir.

Install the cord pipe cover as shown above.

Connect the tubing from the top to the pump and place the pump back inside the reservoir.

Align the grooves and lower the top in to place. Gently twist the top clockwise to lock it in place.

Attach the power cord to the transformer.

The final assembly should look like this →

Now simply fill with clean water and plug into a grounded GFCI outlet. **We recommend keeping bowl 3/4 full of water to avoid pump burnout. Product must be properly stored for winter.**
