

Thank you for buying an Angelo Decor Fountain!

We hope you will find these instructions helpful in setting up your fountain.

If you have any issues with this item, please **DO NOT** return the unit to place of purchase. Please visit our web site, www.angelodecor.com, for assistance and warranty information.

First unpack carton carefully, arranging parts safely in your working area.

The pump comes pre installed with this fountain. Carefully position it so that the pump sits flat and level on the base. The cord needs to have enough slack to sit flat and level on the base and may need to be adjusted.

Once you have positioned the pump, ensure the cord seal is tight and secure.

Carefully align the small pipe at the base of the middle section with the pre-installed pipe in the bowl and carefully slide in place.

Pass the tubing from the top section down through the opening. Slide the top piece into place by aligning the two pipes as shown.

Connect the pump to the tubing from the top through the pump access opening. Be sure the pump is sitting flat and the tubing is not kinked.

Install the pump access door.

Install the legs as shown above.

The final assembly should look like this →

Now simply fill with clean water and plug into a grounded GFCI outlet
We recommend keeping bowl 3/4 full of water to avoid pump burnout.
