

Thank you for buying an Angelo Décor Fountain!

We hope you will find these instructions helpful in setting up your fountain.

If you have any issues with this item, please **DO NOT** return the unit to place of purchase.

Please visit our web site, www.angelodecor.com, for assistance and warranty information.

First unpack carton carefully, arranging parts safely in your working area.

Arrange all pieces in your workspace.

Pass the cord from the light through the opening at the front as shown above.

Attach the cord from the light to the transformer.

Attach the included tubing to the pump.

The pump is set to full strength. Adjust as needed if splash is a concern.

Place the pump inside the fountain so that the tubing sticks out through the front (see above right). Attach the tubing to the fitting on the bottom of the light.

Press the LED light into hole so that it sits flush with the reservoir.

Align the power cords with the groove and install the pump access door.

The final assembly should look like this →

Now simply fill with clean water and plug into a grounded GFCI outlet
We recommend keeping bowl 3/4 full of water to avoid pump burnout.
Product must be properly stored for winter.
