

Thank you for buying an Angelo Decor Fountain!

We hope you will find these instructions helpful in setting up your fountain. If you need more information to properly care for your fountain, please DO NOT return the unit to place of purchase.

Please visit our web site, www.angelodecor.com, for assistance and warranty information.

First unpack carton carefully, arranging parts safely in your working area.

cord through standpipe

cord through bowl

cord through pedestal

Feed light power cord through top, then base, and out groove at bottom. Secure bowl into place

Set pump flow to 2/3 force for best results. Attach tube to pump. Make sure pump sits firmly on bottom, and secure top into place.

Add decorative rocks for finished look. The light unit is photo sensitive, and will come on automatically in low light conditions.

Attach light cord to transformer. Be sure it is tight. Place transformer in a secure area, preferably under cover. While this unit is rated for outdoor use, it should not be fully submersed in the water.

Now simply fill with clean water and plug light and pump into a grounded GFCI outlet

We recommend keeping bowl 3/4 full of water to avoid pump burnout.
