

Thank you for buying an Angelo Decor Fountain!

We hope you will find these instructions helpful in setting up your fountain.

If you have any issues with this item, please **DO NOT** return the unit to place of purchase. Please visit our web site, www.angelodecor.com, for assistance and warranty information.

First unpack carton carefully, arranging parts safely in your working area.

Assemble all parts in your work area.

Install the optional "clicking" bamboo feature by placing it on the holder as shown.

Feed the tubing from the top piece down the opening in the top of the fountain body.

Align the top, then lower and slide it into place.

Locate the tubing from inside the fountain and connect it to the pump.

The pump is preset to 75% strength. If splash is a concern, adjust as needed.

Place the pump flat inside the reservoir. Align the pump cord with the groove and slide the pump access door in place.

The final assembly should look like this

Now simply fill with clean water and plug into a grounded GFCI outlet

We recommend keeping bowl 3/4 full of water to avoid pump burnout.

Product must be properly stored for winter.
