First unpack carton carefully, arranging parts safely in your working area.

Connect the tubing to the pump.

The pump is preset to full strength. If splash is a concern, adjust as needed.

Place the pump inside the reservoir then align the cord with the groove as shown above. Slide the pump access door in place.

The final assembly should look like this →

Now simply fill with clean water and plug into a grounded GFCI outlet.
We recommend keeping bowl 3/4 full of water to avoid pump burnout.
Product must be properly stored for winter.
