

## Thank you for buying an Angelo Decor Fountain!

We hope you will find these instructions helpful in setting up your fountain. If you need more information to properly care for your fountain, please **DO NOT** return the unit to place of purchase.

Please visit our web site, [www.angelodecor.com](http://www.angelodecor.com), for assistance and warranty information.

**First unpack carton carefully, arranging parts safely in your working area.**

Lay out all parts. Decide if you are going to use the solar or electric pump, based on your location. Remember that you will need direct sunlight on the "solar rock" for this pump to work. We recommend installing both pumps as shown.

Pass the power cords through the standpipe in bowl, and pedestal.

Pump cord through pedestal into groove at bottom. Twist and lock bowl to pedestal, note the proper tree branch line up. Make sure you leave enough cord in bowl for pumps to sit flat on bottom of pump cavity.

Attach chosen pump to tubing. Twist and lock top into place. Attach cord to solar rock if that option is chosen.

Now simply fill with clean water and plug into a grounded GFCI outlet  
**We recommend keeping bowl 3/4 full of water to avoid pump burnout.**
