

Thank you for buying an Angelo Decor Feature Fountain!

We hope you will find these instructions helpful in setting up your fountain. If you need more information to properly care for your fountain, please **DO NOT** return the unit to place of purchase.

Please visit our web site, www.angelodecor.com, for assistance and warranty information.

First unpack carton carefully, arranging parts safely in your working area.

This installation shows an above ground application, however you can install the unit below ground to create a flush mount, built in look by digging a hole slightly larger than the three plates.

Place pump in bucket and run cor through notch. Restrictor is included for fine tuning flow. Place pump outlet into tubing.

Insert tubing into pump.

Attach top to middle plate.

Be sure side plate lines up as shown.

Side plates set on bucket using grooves.

Three plates should effect tight fit.

Finish with included rocks.

Now simply fill with clean water and plug into a grounded GFCI outlet
We recommend keeping bowl 3/4 full of water to avoid pump burnout.

Landscape around the unit to create your own finished look.
