

Thank you for buying an Angelo Decor Fountain!

We hope you will find these instructions helpful in setting up your fountain. If you need more information to properly care for your fountain, please DO NOT return the unit to place of purchase.

Please visit our web site, [www.angelodecor.com](http://www.angelodecor.com), for assistance and warranty information.

**First unpack carton carefully, arranging parts safely in your working area.**

Twist and lock top into place, and attach solar panel to pump.

Insert pipe into panel from bottom. Attach tube to pump.

Secure panel in place  
This is the recommended use for this item

Add spray nozzle (if conditions permit)

Please note: This unit is designed to be used with the pipe only, to create a "bubbling effect". The spray nozzle should only be used in protected areas. Windy conditions will cause water to spray outside of the bowl. The spray nozzle can also be adjusted by twisting inner pipe.

Now simply fill with clean water and place in a sunny area

**We recommend keeping bowl 3/4 full of water to avoid pump burnout.**
