

Fountain Bowl Repairs

We hope you will find these instructions helpful in repairing a leaking fountain bowl
As a result of age, misuse and in some cases, as a result of a defect, fountain bowls may develop a leak. The bowls can be easily repaired by following these simple steps.

Place bowl in dry location

Fill bowl with water

Allow bowl to sit.
Look for leak.

Locate leak in bowl.
(In this scenario the leak is a small crack that has developed in the base)

For this repair, **Oatey** Brand Epoxy was used.

Apply putty to the leaking area.

For this bowl, putty was applied in the crack and along the surface area.

Allow the putty to dry fully.
Repeat steps if necessary.

While each scenario may vary, in most cases these general steps can be followed to repair a leaking fountain bowl.

Note: If the crack or leak in the bowl is as a result of a defect, and the customer repairs the damage, Angelo Décor will be happy to provide the customer with some form of compensation or reimbursement.
