

Instructions for Assembly of Lighthouse Fountain

For additional help please visit our website at www.angelodecor.com

Carefully unpack the unit placing parts securely in your work area. Feed pump cord through pipe in bowl, run through pedestal, and pull out cord slack. Fit cord in groove at bottom. Line up twist and lock and attach.

Insert screw (provided) into top

position top onto spill bowl

attach nut (provided)

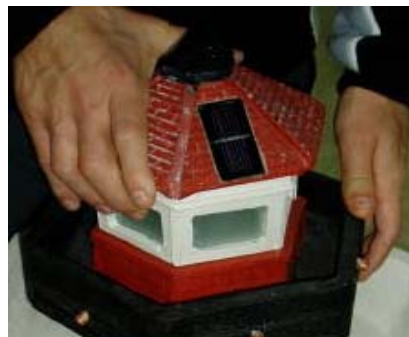

tighten nut firmly

position top together as shown

Set pump to 3/4 strength

Attach tubing securely to pump. Make sure tubing length allows pump to sit firmly at bottom of cavity without bending, as this may reduce water flow. (some trim may be required) Line up twist and lock and turn into place. Top should sit firmly, lined up as shown.

Note the location of the solar panels. The unit should be placed in an area with clear access to natural light. An initial charge of at least 8 hours of sunlight is required before first use.

Important Information about Solar Powered Lights:

The light is powered by a battery, included with this unit. No wiring is required. You can replace the battery using a rechargeable "AA" style battery only.

Please dispose of used battery properly.

The unit will turn on automatically at night. To activate this feature, use the "on/off switch" located on the battery compartment cover. (pictured at right) This can also be used to turn the unit off when not in use, helping extend battery life.
