

Thank you for buying an Angelo Décor Spouting Statue!

We hope you will find these instructions helpful in setting up your spouting statue.

If you have any issues with this item, please **DO NOT** return the unit to place of purchase. Please visit our web site, www.angelodecor.com, for assistance and warranty information.

First unpack carton carefully, arranging parts safely in your working area.

Adjust the pump to the desired setting. We recommend the max setting but this can be adjusted depending on the application.

Connect the included tubing to the pump as shown above.

Place the pump inside the reservoir, pond or water feature.

Connect the tubing to the spouting statue.

Align the tubing with the groove of the spouting statue. This will prevent the tubing from becoming blocked and restricting flow.

The spouting statue can be placed directly on the edge of the desired water feature or as far as 12 inches away, depending on the application.

Please refer to "Before you Begin" page for maintenance information.
