

**Thank you for buying an Angelo Décor Fountain!**  
We hope you will find these instructions helpful in setting up your fountain.

If you have any issues with this item, please **DO NOT** return the unit to place of purchase. Please visit our web site, [www.angelodecor.com](http://www.angelodecor.com), for assistance and warranty information.

**First unpack carton carefully, arranging parts safely in your working area.**

Arrange all parts in your work area.

Pass the tubing from the top piece down the opening in the top of the fountain (as shown above).

Align and lower the top piece in place. Gently press on it to slide and secure it in place.

Locate the tubing from inside the reservoir and connect it to the pump.

The pump is preset to full strength. If splash is a concern, adjust as needed.

Place the pump inside the reservoir. Pass the power cord out the pump access hole at the rear of the fountain.

Move the pump into the back corner and attach the tubing to the clip installed inside the fountain (as shown above).

Align the cord with groove and slide the pump access door in to place.

The final assembly should look like this

Now simply fill with clean water and plug into a grounded GFCI outlet.  
**We recommend keeping bowl 3/4 full of water to avoid pump burnout.**  
**Product must be properly stored for winter.**
