

Thank you for buying an Angelo Décor Fountain!

We hope you will find these instructions helpful in setting up your fountain. If you need more information to properly care for your fountain, please **DO NOT** return the unit to place of purchase.

Please visit our web site, www.angelodecor.com, for assistance and warranty information.

First unpack carton carefully, arranging parts safely in your working area.

Secure bowl to base into place

Pump and light cords through PVC pipe. And lead the cords to the groove at bottom

Adjust flow as desired

Place tube light through opening to bowl

Use restrictor to help control water flow to the top

Connect tubing of top part to the pump

Twist and lock top to bowl

The final assembly should look like this →

Attach light cord to transformer. Be sure it is tight.
Place transformer in a secure area, preferably under cover. While this unit is rated for outdoor use, it should not be fully submerged in the water.

Now simply fill with clean water and plug light and pump into a grounded GFCI outlet

We recommend keeping bowl 3/4 full of water to avoid pump burnout.

Your fountain works better and lasts longer when kept clean using mild soap and soft cloth on a regular basis.
