

Thank you for buying an Angelo Decor Fountain!

We hope you will find these instructions helpful in setting up your fountain. If you need more information to properly care for your fountain, please DO NOT return the unit to place of purchase.

Please visit our web site, www.angelodecor.com, for assistance and warranty information.

First unpack carton carefully, arranging parts safely in your working area.

Remove all packing and parts from inside unit. Be sure to get all foam packing out. Set all parts safely in front. The pump unit has been "pre installed" for your convenience.

Pump should sit as shown. Feed light wire through unit, and attach securely to the transformer as shown.

Pump and light cords are now ready to be plugged in

Set light unit in as shown. We suggest using the pump filter as a riser for better light effect.

add the rocks for a finished look

Now simply fill with clean water and plug into a grounded GFCI outlet

We recommend keeping bowl 3/4 full of water to avoid pump burnout.

Your fountain will work better, and last longer, when kept clean using a soft cloth and mild soap on a regular basis. This item should be stored properly for harsh winters, as water left to freeze in the bowl may cause cracking, which is not covered by warranty. May we suggest you disassemble the unit for the winter months, removing pump and all water, and store in the garage or shed for best results.
