First unpack carton carefully, arranging parts safely in your working area.

Arrange all parts in your work area.

Adjust the pump to your desired setting and connect the pump to the tubing.

After placing the pump inside the reservoir, slide the pump access door slides into place.

For best operation, ensure the fountain is level. You may need to gently wipe your hand along some of the edges to help the water spread when it is first started.

The final assembly should look like this →

Now simply fill with clean water and plug into a grounded GFCI outlet

**We recommend keeping bowl 3/4 full of water to avoid pump burnout.
Product must be properly stored for winter.**
