First unpack carton carefully, arranging parts safely in your working area.

Arrange all parts in your working area.

Feed the pump cord through the cord pipe as shown above.

Install the cord pipe cover by fitting the rubber cap over the pipe.

Align the cord with the groove at the base.

Feed the tubing from the top section through the opening of the middle section as shown.

Place the top piece on to the middle section by aligning the slip mechanism as illustrated .

Now place the combined sections on the edge of the bowl.

Connect the pump to the tubing and lower the combined pieces into place.

Your fountain includes an optional fire feature which should be installed as shown to the left.

Please use **EXTREME CAUTION** when using this device and follow all cautions and warnings included with this device.

Final assembly should look like this 

Now simply fill with clean water and plug into a grounded GFCI outlet

We recommend keeping bowl 3/4 full of water to avoid pump burnout.
