First unpack carton carefully, arranging parts safely in your working area.

Arrange all parts in your work area.

Locate the tubing from inside the fountain and connect it to the pump.

The pump is preset to full strength. If splash is a concern, adjust as needed.

Place the pump inside the reservoir. Align the power cord with the groove and install the pump access door.

The pump access door should look as shown above when installed.

The final assembly should look like this →

Now simply fill with clean water and plug into a grounded GFCI outlet.
We recommend keeping bowl 3/4 full of water to avoid pump burnout.
Product must be properly stored for winter.
