First unpack carton carefully, arranging parts safely in your working area.

Arrange all parts in your workspace.

Pass the pump cord down the cord pipe in the bowl.

Pass the cord down the pedestal and out the base. Align the cord with the groove at the base.

Align and secure the bowl to the pedestal.

Connect the pump to the tubing from the top.

The pump is preset to full strength. If splash is a concern, adjust as needed.

Align and secure the top to the bowl.

The final assembly should look like this →

Now simply fill with clean water and plug into a grounded GFCI outlet

We recommend keeping bowl 3/4 full of water to avoid pump burnout.

Product must be properly stored for winter.
