First unpack carton carefully, arranging parts safely in your working area.

Connect the pump to the pre-installed tubing.
Set the pump inside the rear access hole,
and set firmly in place.

Install the pump access door.

The final assembly should
look like this →

Now simply fill with clean water and plug light and pump into a grounded GFCI outlet
We recommend keeping bowl 3/4 full of water to avoid pump burnout.

Your fountain works better and lasts longer when kept clean using mild soap and soft cloth on a regular basis.
