

Thank you for buying an Angelo Décor Fountain!

We hope you will find these instructions helpful in setting up your fountain. If you need more information to properly care for your fountain, please DO NOT return the unit to place of purchase.

Please visit our web site, [www.angelodecor.com](http://www.angelodecor.com), for assistance and warranty information.

**First unpack carton carefully, arranging parts safely in your working area.**

Ensure all of the screws on the pre-installed cord seal are tight.

Adjust the pump to full strength. If splash is a concern, reduce the flow as needed.

Twist and lock the pump housing in place.

Using the included connection and "Y" joint, connect the tubing from the top sections as shown above.

Adjust the restrictor as desired to increase or decrease water flow.

Connect the tubing to the pump, and place inside the housing.

Twist and lock the top to the pump house.

Install the pump access door.

Your fountain includes an optional fire feature which should be installed as shown above. Please use **EXTREME CAUTION** when using this device and follow all cautions and warnings included with this device.

The snuffer (shown above left) should be used to extinguish the flame. When not in use, it can be hung from the fountain as shown above.

**Final assembly should look like this**

Now simply fill with clean water and plug into a grounded GFCI outlet

**We recommend keeping bowl 3/4 full of water to avoid pump burnout.**
