First unpack carton carefully, arranging parts safely in your working area.

Arrange all parts in the work area.

Feed the tubing from the top bowl through the opening as shown.

Slide the top bowl into place as illustrated above.

The top bowl should look like this when set in place.

Slide the middle bowl into place.

Slide the final bowl into place as shown above.

Connect the pump to the tubing from the top section of the fountain.

Place the pump inside the reservoir.

Install the pump access door.

The final assembly should look like this

Now simply fill with clean water and plug into a grounded GFCI outlet
We recommend keeping bowl 3/4 full of water to avoid pump burnout.
Product must be properly stored for winter.
