

Contemporary Tier Fountain Setup

Thank you for buying a "Contemporary Tier" Fountain by Angelo Décor!
We hope you will find these instructions helpful in setting up your fountain.
If you have any questions with set up, parts replacement or warranty info, please, rather than returning your unit to the store, try a visit to our website, and give us a chance to help you. You will find helpful info at www.angelodecor.com

First unpack carton carefully, and inspect contents carefully.

Place the pump and tubing in large bottom bowl as shown.

Feed tubing through middle bowl and fit into grooves as shown.

It is best to slide bowl into groove from front to back.

Insert tubing into nipple on top bowl, and fit into place.

Be sure cord goes smoothly into groove.

This is the correct water flow. If your unit looks like this, you have a successful setup!

Please keep clean using a mild soap and soft cloth, and inspect pump for debris often.

We recommend keeping bowl 3/4 full of water to avoid pump burnout.
We also remind you that this item should be stored properly for harsh winters, as water left to freeze in the bowl may cause cracking, and is not covered by warranty.
May we suggest you disassemble and store for the winter months to preserve and prolong your investment.
CONGRATULATIONS! We wish you years of enjoyment.
