

# Da Vinci Fountain Setup

Thank you for buying a "Da Vinci" Fountain by **Angelo Décor!**  
We hope you will find these instructions helpful in setting up your fountain.  
***If you have any questions with set up, parts replacement or warranty info, please, rather than returning your unit to the store, try a visit to our website, and give us a chance to help you. You will find helpful info at [www.angelodecor.com](http://www.angelodecor.com)***  
**First unpack carton carefully, and inspect contents carefully.**

Place the legs on firm, level ground and place bowl into place noting peg and groove. You can use clear outdoor silicone if you are concerned about a more secure fit.

Place pump into far left groove, and put top in place so clear tubing fits into grooves without pinching.

Attach tubing to pump. Note the position of the flow control, as it should be set to maximum as shown.

The most common problem is "kinked" tubing that will prevent proper flow and operation. You may have to trim the tube slightly for better fit. Check that the "T" connection fits securely over the tubing leading to the top, and all tubing is free from bending.

Pump should sit firmly at bottom

Pump cover is placed into bowl noting groove at bottom. It should sit level. Water level should remain higher than the "second step" to reduce splash.

Please keep clean using a mild soap and soft cloth, and inspect pump for debris often.

**We recommend keeping bowl 3/4 full of water to avoid pump burnout.**

We also remind you that this item should be stored properly for harsh winters, as water left to freeze in the bowl may cause cracking, and is not covered by warranty.

May we suggest you disassemble and store for the winter months to preserve and prolong your investment.

**CONGRATULATIONS!** We wish you years of enjoyment.
