First unpack carton carefully, and inspect contents carefully.

Insert pump into housing, cord out through hole

Attach pump to tubing, cord out back into groove

Set pump strength as desired, place pump upright into housing

Note position of restrictor for water adjustment
secure top to bowl using twist and lock

Legs are positioned as shown

Add mosaic insert if desired

Please keep clean using a mild soap and soft cloth, and inspect pump for debris often.

We recommend keeping bowl 3/4 full of water to avoid pump burnout.

We also remind you that this item should be stored properly for harsh winters, as water left to freeze in the bowl may cause cracking, and is not covered by warranty.

May we suggest you disassemble and store for the winter months to preserve and prolong your investment.

CONGRATULATIONS! We wish you years of enjoyment.
