First unpack carton carefully, and inspect contents carefully.

unpack carefully

2 people required to unpack,
one holds base, other removes top

unpack pump

attach pump, check that tubing length
allows pump to sit at bottom

set pump to high flow

pump and cord should be
placed as shown

carefully lower pump into cavity,
keeping cord in groove

line up posts with grooves
fit firmly into place

this is how a finished
installation should look!

Please keep clean using a mild soap and soft cloth, and inspect pump for debris often.

We recommend keeping bowl 3/4 full of water to avoid pump burnout.

We also remind you that this item should be stored properly for harsh winters,
as water left to freeze in the bowl may cause cracking, and is not covered by warranty.

May we suggest you disassemble and store for the winter months to preserve and prolong your investment.

CONGRATULATIONS! We wish you years of enjoyment.
