

Renaissance Tier Fountain Setup

Thank you for buying a "Renaissance Tier" Fountain by Angelo Décor! We hope you will find these instructions helpful in setting up your fountain. **If you have any questions with set up, parts replacement or warranty info, please, rather than returning your unit to the store, try a visit to our website, and give us a chance to help you. You will find helpful info at www.angelodecor.com**
First unpack carton carefully, and inspect contents carefully.

1-4 Start by passing the pump cord through the bottom bowl, then through base, setting into grooved notch at bottom.

5. Attach bowl to base with twist and lock system./ 6. Adjust pump to high./ 7. Place pump in cavity at angle./ 8. Ease pump into cavity so it sits level and pump cord goes into rooved notch.

9. Attach tubing to pump 10. Pass tube through riser 11. twist and lock in place 12. tubing through bowl

twist and lock in place

cut tubing to size

attach tube to pipe

twist and lock in place

To insure proper water spill, it may be necessary to "shim" some parts to achieve level operation. The riser and bottom are two areas that are easy to address. Use a small piece of the clear tubing to support these parts.

We recommend keeping the bowls 3/4 full to avoid pump burnout.

We also strongly advise to disassemble and store during harsh winters, as items left outside to freeze could crack which voids warranty.

CONGRATULATIONS! Now simply keep your fountain maintained properly, and you will be rewarded with years of enjoyment.

Riser and bottom shims
