

Solar Statue Setup

SOLAR POWER STATUE INSTRUCTION SHEET

Before use please ensure a full initial charge in direct sunlight of at least eight hours, to prepare the storage and charging system.

Please note the switch on the bottom. This will turn the light on and off. Please switch off if the light is not used for extended periods, or if you want it to come on later in the evening.

Solar powered statues should be kept in an area with at least partial sunlight for best results on an ongoing basis.

The warranty for our solar power garden and décor statues is ninety (90) days from date of purchase. Your receipt is your proof of purchase.

If you have any further questions please contact us at: info@angelodecor.com and we will try and help you further.

Fountain Guy Says:

Be prepared to experiment a little with optimal settings; such as charging time, the amount of sunlight you may require, or switching it on and off.

The most important thing to remember is the initial charging time. These little solar powered statues store energy during the day and a good dose of sun first off will be best.
