

We hope you will find these instructions helpful in setting up your product. If you have any issues with this item, **DO NOT** return the unit to place of purchase. Please visit our web site www.angelodecor.com for assistance and warranty information.

Carefully unpack and arrange all parts.

Retrieve the tubing and light connection from the fountain.

The light connection must sit outside the fountain.

IMPORTANT: to prevent water loss during operation, create a drip-loop with the light cables by dipping them into the reservoir before they exit out the back of the fountain.

Attach the tubing to the pump. Water flow can be adjusted using the control on the front of the pump.

Place the pump inside the fountain.

Securely attach the cable from the light connection to the transformer.

Fill with clean water and plug into a grounded GFCI outlet.

The pump must be fully submersed at all times to avoid pump burnout.

This product must be dried and stored during freezing temperatures.
