

We hope you will find these instructions helpful in setting up your product. If you have any issues with this item, **DO NOT** return the unit to place of purchase. Please visit our web site www.angelodecor.com for assistance and warranty information.

Carefully unpack and arrange all parts.

If not already attached, locate the installed light cables and securely attach them to the 2 to 1 light connection.
The light connection should sit outside the fountain.

IMPORTANT: to prevent the risk of water loss, create a drip-loop with the light cords by dipping them into the reservoir before they exit out the back of the fountain.

Attach the cord from the light connection to the transformer.

Locate the tubing from inside the fountain and attach it to the pump.
Water flow can be adjusted using the flow control dial on the pump.

Place the pump inside the fountain.

If splash is a concern, the included black foam can be cut and positioned along spillways to help calm the water flow.

Fill with clean water and plug into a grounded GFCI outlet.

The pump must be fully submersed at all times to avoid pump burnout.

This product must be dried and stored during freezing temperatures.
